Summary

I am a back-end developer with 2 years of experience in developing API and maintaining websites. I am skilled in HTML5, PHP, Laravel, JavaScript, CSS, PostgreSQL, MySQL, Tailwind, Bootstrap, and Nodejs, and I work on both front-end and back-end development. I enjoy solving problems and working with teams. I am always learning and aim to build efficient and reliable software. My goal is to leverage my skills to work on projects that make a positive impact for users.
